

# African Agribusiness Academy: The Mid-term Review 2016

## African Agribusiness Academy (AAA)

The African Agribusiness Academy was founded in 2010 with the aim of increasing food security by supporting entrepreneurship in Africa.

### Client:

African Agribusiness Academy (AAA)

The Mid-term Review (MTR) investigated how AAA is doing in terms of reaching its objectives as a member-driven organization. It explored where there may be opportunities for partnerships, possible scenarios for change, the long-term sustainability of the organization, and handover strategy to local leadership.

### Services:

Design of the Mid-term review approach  
Research protocol & analysis plan  
Design of electronic data collection tools  
Data collection  
Electronic data collection & analysis  
Facilitation of validations workshop  
Report writing

Ultimately, the findings of the MTR will inform decision-making for the re-design of AAA's governance structure, its activities, services and even its geographic scope.

DPC designed the mid-term review approach, which included design of the research protocol, the sample and analysis plan, development of the electronic data collection tools, data collection in six countries (Tanzania, Kenya, Uganda, Malawi, Ethiopia and Rwanda), data processing, post coding, analysis and report writing.

DPC facilitated two validation workshops; in Kigali (RW) with AAA stakeholders, and in Wageningen (NL) with sponsors and AAA implementing agents. At both events, DPC presented the findings and gathered feedback from the participants to validate the findings.
